

We are very excited to announce that CanReg has been acquired by i3, a global contract services organization serving the pharmaceutical, biotechnology, and medical device industries. CanReg and i3 have worked together on a number of important projects over the years and have recognized the unique value each company brought to those customer engagements.

i3 is a division of Ingenix, a leading health information, technology, and consulting company based in Eden Prairie, Minnesota. Ingenix is a division of UnitedHealth Group, a diversified health and well-being company, headquartered in Minneapolis, Minnesota. UnitedHealth Group employs over 75,000 people and was ranked No. 21 in Fortune Magazine's 2009 rankings of the 500 largest U.S. corporations.

Now operating as i3 CanReg, we have created one of the most comprehensive regulatory affairs consulting firms in the world. Our customers will benefit by gaining direct access to broad clinical and risk management expertise, as well as a variety of other services to move their products through the development and commercialization regulatory lifecycles.

We anticipate very little change to our core business as a result of this transaction. CanReg's senior leadership is dedicated to maintaining our strong relationships with customers and regulators, and we will continue to develop our business as part of i3.
